

April 17, 2020

Good afternoon,

We are pleased to announce the release of a **new** COVID-19 clinical order set (COS), as well as several updates to existing COVID-19 COS.

As there are frequent updates to the COVID-19 COS it is imperative that you retrieve the COS from our [Skyline page](#) as required and do not store on unit in paper form per our policy.

NEW COVID-19 CLINICAL ORDER SET:

PPO-ED-AMS-40032 [Regional COVID-19 Known or Suspect Emergency Room Management – Adult](#)

REVISED COVID-19 CLINICAL ORDER SETS:

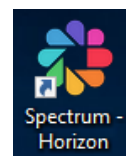

PPO-AMS-40031 [Regional COVID-19 Known or Suspect Admission – Adult](#)
*new parameters for IPC, Oxygen and Anti-Microbial Stewardship Guidelines

DIR-ED-40041 [Regional COVID-19 Active Screening Directive](#)
*new parameters for screening addition of respiratory therapists

We are pleased to announce that links to clinical order sets will be added to the guidelines on the Horizon Spectrum application as of **today, April 17 at 6 p.m.** Guidelines with an associated regional clinical order set will have a new category entitled, “Horizon Clinical Order Sets” and the links in guidelines will forward directly to the COS on our Skyline site.

This feature will only be accessible when accessing Spectrum on a desktop computer within a Horizon facility. Spectrum can be accessed from the shortcut pushed to all Horizon computer desktops or through Skyline.

Thank you to the Antimicrobial Stewardship Committee for their work on this project.

If you have any questions or concerns regarding clinical order sets, please contact me via email at Christie.Ruff@Horizonnb.ca
