HORIZON BULLETIN

[Accessing corporate e-mail on mobile devices](#)

Please be advised that changes are being made for accessing corporate email on mobile devices. In order to maintain the security of the corporate email system, access is only permitted as follows:

1. Using the Outlook Web Access service on personal devices (see instructions here).
2. Using the email application on corporate (Horizon provided) phones
3. Using the email application on personal phones managed by the BYOD (Bring Your Own device) service.

Between July 8 and July 24, changes will be made to address a known security vulnerability. Once these changes have been applied, access to corporate emails on mobile devices will only be permitted using one of the three options above.

If you require access to e-mail on your personal phone, please speak to your manager to discuss options. Click [here](#) to read more on Skyline.

[Skype service interruption](#)

You will not be able to use Skype on Wednesday from 10 to 11 p.m. Click [here](#) to read more on Skyline.
