#### COVID-19 Bulletin

##### [Update on new COVID-19 Assessment Centres](#)

As communicated in [Special Bulletin – COVID-19 – New Assessment Centres – January 22, 2021](#), Horizon is opening new, temporary COVID-19 Assessment Centres in Sussex, Sackville and Perth-Andover.

We now have a confirmed location for the Sackville site: **Tantramar Civic Centre**, 182 Main St. This site will begin testing patients for COVID-19 tomorrow, Tuesday, Jan. 26.

Both the Perth-Andover (Perth-Andover Baptist Church) and Sussex (Gateway Mall) sites began seeing patients over the last few days, and are running well.

These new, **temporary locations** will allow Horizon to increase capacity for COVID-19 assessments and make it easier for residents of surrounding rural communities to get tested.

Hours of operation at each location will be based on need, and sites will remain in place as long as there is sufficient demand for this service.

Reminder: Like all other COVID-19 Assessment Centres in New Brunswick, these new sites will be **by appointment only**.

When requesting an appointment through [www.gnb.ca/coronavirus](http://www.gnb.ca/coronavirus) or Tele-Care 811, **residents of the surrounding areas of these temporary sites should choose the permanent site as their preferred site (i.e. Moncton for Zone 1; Saint John for Zone 2; Hartland for the Upper River Valley area of Zone 3)**. When they receive a call to book their appointment, they will be offered testing at the location nearest to them.

We are very appreciative of all those who have made tremendous efforts to get these sites up and running quickly and efficiently and are continuing to provide safe care to all New Brunswickers.

##### [Health care workers and food safety – All Phases](#)

The Public Health Agency of Canada: Routine Practices and Additional Precautions for Preventing the Transmission of Infection in Healthcare Settings November 2016 says eating, and drinking should not occur in areas where direct patient care is provided.

# Bulletin #112: COVID-19 Information

## January 25, 2021

Health care workers (HCWs) are not to eat or drink in patient care areas, nursing stations or charting areas. The consumption of food is limited to lunch rooms and cafeterias.

During the pandemic, HCWs are asked to take additional precautions to minimize the risk of transmission of infections and to eliminate the sharing of food. When food is shared there is a risk that the containers containing the food may become contaminated through contact with the hands of the HCWs.

### What food can HCWs bring into the facility?

#### Take-out food

Take-out food from licensed establishments is permitted with the following conditions:

- Must be packaged for **personal consumption** i.e., personal size pizza, burger, sandwich etc. These are for a single individual to consume. There is to be no sharing of take-out food
- Food that is packaged to be shared i.e. buffet style packaging, party pizzas, sandwich platters, etc. is **not** permitted.
- The individual delivering the food will need to successfully pass the screening protocol at the facility's designated entrance before the food is accepted into the facility.
- The HCW will be required to pick up the take-out food from the access point.
  - Delivery individuals will not be permitted to deliver within the facility.
  - Staff / volunteers working in the screening area are not responsible for delivering this food.

#### Storage of food

The consumption and storage of food must follow [Infection and Prevention and Control Routine Practices](#) where the food is kept and consumed in non-work areas such as lunch rooms.

#### Lunch rooms

HCWs **must** perform hand hygiene before and after eating.

As facial protection is removed while eating and drinking, physical distancing of two metres **must** be maintained.

Lunch and break times should be staggered to ensure HCWs are able to maintain two metres physical distancing and respect lunch room capacity limitations.
