

## Call for respiratory therapists to support COVID-19 vaccination clinics

Did you know? Respiratory therapists (RTs) can complete training to become immunizers at our upcoming community COVID-19 vaccination clinics.

In order to efficiently immunize our population, we are building a strong and committed workforce dedicated to COVID-19 vaccination clinics, while also maintaining services in our hospitals and community sites.

The Redeployment Centre is active to redeploy staff affected by a service slow down or closure to an area of high need and to staff those services impacted by an increase in service needs during our pandemic response such as a vaccination clinic.

**If you are working part-time or casual and looking to pick up extra shifts to assist in these areas or are working full-time and affected by a service slow down, please speak to your manager. Your manager can add your name to the redeployment tracker with the number of shifts you are available to help with.**

We are also recruiting for non-clinical (administrative) positions like screening, registration, wayfinding, recovery, and runners. The process for redeployment is the same as for clinical positions, please talk to your manager.

We all have a role to play in preventing the spread of COVID-19.

For more vaccine information, including FAQs, visit the [Vaccine Information](#) page on Skyline.
