Re: **Bulletin #61d – COVID-19 – Disinfectant Sprays – July 9 2020**

This memo comes as a follow up to a [memo](#) issued on April 10, relative to the above-referenced item. In April, we advised that in non-clinical areas, disinfectant spray could be requested through local Environmental Services Departments.

At this time, a revised direction is being issued for the process of obtaining disinfectant sprays for non-clinical areas/departments, when required.

Departments are directed to requisition and order such products from General Stores (inventory) for either one of the following products:

Item 1530003 – Oxivir TB, 946ml Disinfectant Spray
Item 0139543 – On The Mark, 1L Disinfectant Spray

As per all pandemic inventory items, Service New Brunswick will be monitoring usage and inventory levels.
