#### **COVID-19 Bulletin**

##### **Updated mandatory mask signage**

We have updated Horizon mask signage in accordance to new direction that was shared in [Bulletin #76c – COVID-19 – HR Update – Oct 13 2020](#).

Unless an employee or physician is alone in an office, masks must be worn at all times, regardless of whether two metres of physical distancing can be maintained.

Note: This is a change to practice where previously employees and physicians could have removed their masks if two metres of physical distancing could be maintained.

The new bilingual poster can be found on Skyline [here](#).

##### **Moncton (Zone 1) and Campbellton (Zone 5) area communities**

In order to eliminate any confusion as to what communities fall in the Moncton (Zone 1) and Campbellton (Zone 5) areas,

Horizon has developed a map listing these communities. You can view the map and list [here](#).

Screeners at all facilities will be provided with copies of this material, and it will be shared on digital screens in Horizon facilities, on [horizonnb.ca](#) and in our community e-newsletter.

##### **Patient and designated visitor personal items – All phases**

Patient/Designated Visitor personal items will be accepted into the facility if items can be easily wiped and cleaned with a disinfectant, and meet the screening criteria of being in a household where none of the occupants are on self-isolation

Click [here](#) to view examples of accepted and not accepted items.

##### **GNB Updates**

Public Health reported three new cases in Zone 5 (Campbellton region) today.

## Bulletin #78: COVID-19 Information

October 19, 2020

On October 18, Public Health reported three new cases in Zone 5 and two in Zone 1 (Moncton region). New Brunswick recorded its third death related to the COVID-19 in the Zone 1.

Public Health identified a positive case in a traveller who may have been infectious on Oct. 8 while on flight Air Canada Flight 8954 – from Toronto to Fredericton.

Individuals who travelled on this flight should self-monitor for symptoms for 14 days after the flight.
