

CORPORATE UPDATE
Bulletin #94a: COVID-19 Updates
Dec. 4, 2020

Masks and drive-thru windows

New preventative measures from Public Health and WorkSafeNB mean face masks are now required when accessing goods through a drive-thru window — in yellow, orange and red alert levels.

This affects our staff, physicians, patients and visitors when accessing a Horizon parking booth.

Please ensure you wear a mask when interacting with a parking booth attendant (or when you go to any drive-thru). Community face masks can be worn.

Masks must be worn when physical distancing of two metres or more cannot be maintained. As most drive-thru interactions occur within this two-metre zone, masks are required for workers and any occupants of the vehicle within two metres of the drive-thru window.

Thank you for doing your part to help slow the spread of COVID-19!

Remember: Hand washing immediately upon entry to a Horizon facility is a requirement of all employees and physicians. All employees and physicians are required to wear a mask in order to enter a Horizon workplace.
