Re: **Vaccination Reminder**

Further to the amended COVID-19 vaccination policy for health care workers communicated on Oct. 8, 2021, this is a reminder that unvaccinated health care workers looking to provide proof of two doses by the Nov. 19, 2021 timeframe will need to have received their **first dose by Oct. 22, 2021**.

You can get the facts about COVID-19 vaccines [here](#) and book your vaccination appointment [here](#).

The vaccines are effective, will keep you, your coworkers and your loved-ones safe. They reduce the risk of hospitalization and overburdening our health care system which negatively affects many other important hospital services beyond intensive care units.

Each new development throughout this pandemic journey, including the severity of this fourth wave, can raise a range of emotions.

For those looking for additional support, please refer to the resources found on the [Employee Wellness page](#) on Skyline, and remember, EFAP is here for you 24 hours a day, seven days a week. Call 1-800-663-1142 or log in on the [website](#) anytime.
