Re: **Outbreak on Units 5600/4200 at Horizon's The Moncton Hospital Declared Over**

This memo was previously shared with Moncton area staff and physicians.

I am pleased to share the COVID-19 outbreaks on General Surgery (5600) and Oncology (4200) at Horizon's The Moncton Hospital are now over.

The outbreak on 5600 was declared on Monday, Oct. 11 and declared over late Friday on Nov. 12. The outbreak on 4200 was declared on Tuesday, Oct. 12 and declared over on Saturday, Nov. 13.

Effectively immediately, we have re-opened the units to transfers and the units are again welcoming Designated Support Persons (DSPs) for eligible patients.

General visitation remains restricted because of Horizon's operational response to COVID-19.

Thank you to all Horizon staff who responded quickly to these outbreaks, and who followed enhanced IPC guidelines to ensure the health and safety of our patients and clients, staff, physicians, and communities.
